

ST. JOHN'S C.E. PRIMARY SCHOOL

Science Week 2023

St John's LOVE Science

We celebrated Science week 27th-31st March 2023

- All classes completed a practical investigation in their classrooms in addition to their regular science learning

Years 1-6 then had the
opportunity to share their
learning with the school
in a science fair on the
Friday

Everyone learned something new!

The theme for the week was 'Connections'

- Y1 – learned about germs and the role of soap in handwashing
- Y2 – taught us all about rising sea levels and showed us how ice melts
- Y3 – demonstrated the force of friction between shoes and different surfaces
- Y4 – taught us about states of matter and how to time an investigation
- Y5 – investigated whether there is a connection between foot length and how far we can jump
- Y6 – showed us how to build circuits and control electrical connections with switches

Mrs Horne was helped by
her amazing Science
monitors from Y6

**We loved
testing new skills...**

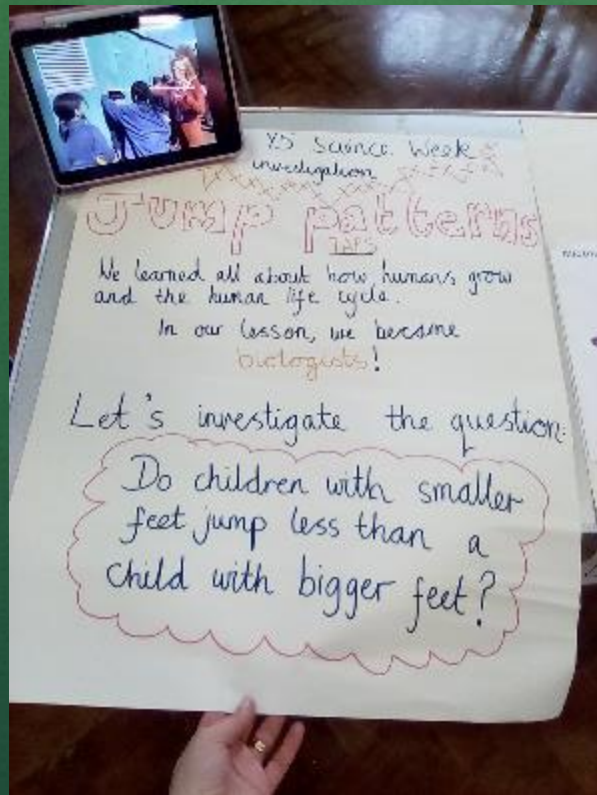

Everyone helped
each other to learn
something new

Science is FUN for EVERYONE

Science Brilliant book
assembly showcased all we
had done and our scientists
were awarded certificates

Well done 😊

We are already looking
forward to next year's
Science Week 😊

So watch this space!
